WE DESIGN YOUR E-LEARNING

Every need is unique.

OUR EXPERTISE IN LEARNING TECHNOLOGIES

We have been **training with technologies** since 2000, and we propose "solutions for learning".

We help organizations achieve better learning outcomes and increase the value of their human capital.

CLOUD LMS

Our cloud LMS solutions, based on open-source technologies, are **planned and customized on your specific needs** to give you the best learning experience being safe.

The goal is **to reduce the cost of training, increasing engagement with training programs**, and avoiding the technical issues you may encounter managing your own learning environment.

Both for Totara and Moodle we offer **cloud LMS services based on Amazon Web Services (AWS)** that are safe and reliable, fully supported by our **technical team and learning specialists**.

Our **clients**:

- corporate
- government
- university
- vocational training
- schools

PLATFORMS: SPECIFIC SOLUTIONS

We have developed **specific solutions** to answer every need:

- e-commerce suite
- ECM suite
- technical and commercial training
- universities and organizations
- fundend training suite

CUSTOMIZED E-LEARNING FOR EVERY POSSIBLE NEED

Today, in order to achieve your business goals, it is crucial that your employees have the right **knowledge, skills and experience**.

Using our open-source solutions, you can deliver learning effectively through individual **learning plans** which reflect your employees' roles, training needs and goals.

Your learning platform can be quickly implemented **at a fraction of the cost** of proprietary solutions.

Ask us to develop together the best solution for you!

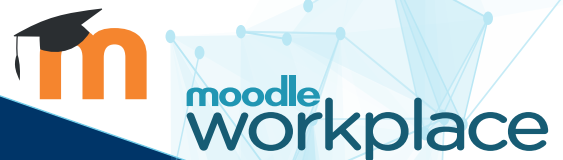

CUSTOMIZED LEARNING WITH THE BEST TECHNOLOGIES

Official and certified partners of the best Learning Technologies softwares worldwide.

TOTARA&MOODLE

Totara and Moodle are the most well-known open-source systems worldwide.

A talent management and a learning management system to deliver e-learning and improve your education experience!

TOTARA LEARN

Totara Learn is a **corporate distribution** of Moodle designed specifically to meet the requirements of corporate learning. Totara Learn is designed specifically to let you achieve corporate training needs, through **competency structures** and **learning paths**, individual **development plans**, **team and classroom management** functions and customizable **reporting**.

Totara Learn is easy to use thanks to an **adaptable and customizable interface** based on user needs, and it also supports the training and structural complexity that a large organization needs. By managing hierarchical and organizational positions and skills frameworks, it allows you to create the best training courses for the development of human resources.

TOTARA ENGAGE

Totara Engage is a powerful **informal collaboration** platform to enhance work in **enterprise-type** realities.

Through **collaboration tools**, **knowledge management**, **informal learning**, **sharing of experiences**, it is a new way to work differently, improving performance.

TOTARA PERFORM

Totara Perform is a **hugely flexible system** to be tailored to your performance management processes to match your business needs.

As those needs evolve, **changes can be implemented quickly**, keeping you firmly on the path to continuous business improvement.

MOODLE

With 300 million users across the globe, Moodle is the **learning management system most used in the world**. Moodle is an LMS highly configurable and full of features that enables organizations to achieve their learning goals.

Alongside its teaching philosophy, based on **constructivism** and **social constructionism**, it allows you to use any traditional training methodology, from behaviorism to cognitivism setting your **learning strategies** according to your **training goals**.

MOODLE WORKPLACE

Designed to manage **organizations' training**, Moodle Workplace integrates the traditional functions of Moodle with many other new extensions, becoming a winning solution for the training and development of human resources. It is a solution that combines the learning features of Moodle with the **managing needs** of complex organizations.

SaaS AgID QUALIFICATION

Our SaaS services are qualified for the **AgID Cloud Marketplace Service Catalog**. Our Moodle and Totara cloud services can be purchased by Public Administrations as part of the process to encourage the adoption of the Cloud Model of the PA.

MediaTouch cloud solutions **based on the AWS infrastructures** are a **safe, reliable** and **compliant choice** with national legislation for Universities and Public Administrations.

YOUR CHANGE STARTS WITH US

Cutting-edge technological solutions to achieve your training.

VIRTUAL CLASSROOM

CLASS

Class makes you live the experience of a real classroom directly at home or in the office with a specific interface and selected tools based on the actual live learning experience through the software **Zoom**.

Class is the response to many teachers, professors and trainers that want to bring their lessons online to the next level making them **more interactive and engaging** and guaranteeing the best managing options for the teacher.

BIG BLUE BUTTON

It is the **video conferencing service integrated with Totara and Moodle**, which offers all the tools to carry out your lessons online.

It supports multiple audio / video streams, presentations with extended virtual whiteboard functions, desktop sharing, VOIP, public and private chat, session recording and much more.

As simple as a click on a "big blue button"!

VIDEO CONFERENCING

ZOOM

Zoom is **one of the most widely used cloud-based services** worldwide to create video conferences with a diverse number of users at the same time.

Zoom also includes a Webinar section, which is well suited to large-scale content delivery.
